

HASSAN JAVED

Software Engineer

 hassanjaved186@gmail.com  hassanj.dev  hassanjaved186

EXPERIENCE

Software Tester (Remote)

BTMG USA

 Aug 2022 – Sept 2022

- Working alongside a Senior Software Engineer, rigorously testing real world software developed for clients.
- Familiarised myself in an Agile working environment.
- Built on my communication skills by interacting with the engineers and highlighting bugs in the software

PROJECTS

Netflix Clone

Front-end clone of Netflix homepage

 November 2022  divizn/clone-sites

- Used React and Tailwind to copy the frontend design of the UK Netflix homepage

Discord Bot

Discord bot used to interact with Spotify API)

 September 2022  divizn/discord-spotify-bot

- Created a Discord bot in Python with Discord and Spotify API (discord.py and spotify libraries).
- Learnt how to work with documentation and utilise APIs
- Briefly deployed the bot using Heroku
- This bot has commands which allows a user to search for songs and artists from the Spotify database and a lot more which can be seen in the repository and live demo.

Weather App

Web application displaying realtime weather data

 October 2022  divizn/react-weather-app

- Created a weather app in ReactJS that displays current weather information for a city that the user searches for.
- Used openweathermap API to retrieve the weather data via axios library.
- Learnt how to deploy using create-react-app to build the project and then host on Netlify through GitHub

Personal Site

Personal site that acts as a portfolio
