EDUCATION

Brunel University London

*Bachelor of Science in Computer Science - **First Class** with Honours*

London, UK

Sept. 2021 – June 2024

EXPERIENCE

BTMG USA

Software Engineer Intern

June 2021 – September 2021

Remote

- Developed a REST API using Nest.js and MySQL to query sensitive data
- Developed a full-stack web application using React, MySQL and Express for a business management system
- Reduced load times on various API endpoints by **10%** resulting in a faster, more responsive experience for users

PROJECTS

Netflix Clone | *JavaScript, React, TailwindCSS, NextJS*

- Developed a dynamic and responsive Netflix clone showcasing proficiency in modern frontend technologies/frameworks.
- Leveraged Next.js's server-side rendering (SSR) improving performance and SEO, resulting in **40%** faster load times and better user engagement.
- Designed and customized reusable UI components with Tailwind CSS, ensuring a consistent and visually appealing user interface.

Discord Bot for Spotify Integration | *Python, Discord.py, Spotipy*

- Developed bot that integrates with Spotify API to fetch and display detailed information about artists and songs
- Engaged over **20 users** by designing and implementing intuitive commands for searching artists and songs.
- Optimized data retrieval and response times by implementing asynchronous programming with Python's `asyncio`, improving bot performance.
- Conducted extensive testing and debugging to ensure seamless interaction between Discord and Spotify APIs, enhancing bot reliability.

Real-Time Weather Web App | *JavaScript, React, Axios, Netlify*

- Developed a real-time weather web application using React, showcasing the ability to build dynamic and responsive user interfaces.
- Utilized Axios for API calls to handle asynchronous data fetching and error handling, providing reliable real-time updates to users.
- Designed a user-friendly and responsive interface using CSS and responsive design principles, ensuring a seamless experience across devices.
- Deployed the web app on Netlify, making the app accessible to users globally.

EXTRACURRICULAR

Google IT Support Professional

- Completed this course within a week with an average grade of **90%**

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, Go (Golang), Java, Python, C/C++, C#, Lua, SQL (Postgres, MySQL), HTML/CSS (SASS/SCSS), R

Frameworks: React, React Native, Vue, Svelte, NextJS, Node.js, Astro, Flask, Django

Developer Tools: Git, Docker compose, Firebase, AWS, Linux

Concepts: Software Engineering, Frontend and Backend (Full-stack) Development, Machine Learning, Natural Language Processing
